Trend Micro to Assemble and Donate Bicycles to Benefit Underprivileged Children in Chicago

Bicycle Build-Off volunteer project supports The Union League Boys and Girls Club

Trend Micro Incorporated (TYO: 4704; TSE: 4704), a global pioneer in security software, today announced its participation in a community service bicycle building workshop benefitting The Union League Boys and Girls Club in Chicago on May 16. Trend Micro employee volunteers, partners and customers will assemble and donate bicycles for underprivileged children.

"Trend Micro is deeply committed to supporting local communities and this program is an excellent way to give back," said Wael Mohamed, COO, Trend Micro. "Knowing that our work will help reward and encourage children is extra motivation, and we couldn't be happier to help. This workshop provides us with the opportunity to do something positive, while building a sense of camaraderie among our team. It's a true win-win!"

In cooperation with the "Bicycle Build-Off" program, the bicycles assembled by Trend Micro employees, partners and customers will go directly to members of the Barreto Club within The Union League Boys and Girls club. Located in Chicago's Pilsen neighborhood, the group encourages children to pursue good behavior and academic success, while demonstrating strong character, citizenship and healthy lifestyles. Exemplary members who have achieved improved grades and behavior will be awarded with the bicycles.

The Union League Boys and Girls Club of America has six locations throughout the Chicago area and serves more than 11,000 children per year. Its mission is to promote the social, moral, vocational, physical and educational development of boys and girls in Chicago.

Since its founding in 1988, Trend Micro has been committed to being asocially responsible corporate citizen to benefit its local communities around the world.

About Trend Micro

Trend Micro Incorporated, a global leader in security software, strives to make the world safe for exchanging digital information. Built on 25 years of experience, our solutions for consumers, businesses and governments provide layered data security to protect information on mobile devices, endpoints, gateways, servers and the cloud. Trend Micro enables the smart protection of information, with innovative security technology that is simple to deploy and manage, and fits an evolving ecosystem. All of our solutions are powered by cloud-based global threat intelligence, the Trend Micro™ Smart Protection Network™ infrastructure, and are supported by over 1,200 threat experts around the globe.
