Trend Micro Expands Presence on Microsoft Azure Marketplace With Deep Security as a Service Offering

Microsoft Azure customers gain access to leading cloud workload security with simple pricing

DALLAS--([BUSINESS WIRE](#))--[Trend Micro Incorporated](#) ([TYO: 4704](#); [TSE: 4704](#)), a global leader in cybersecurity solutions, today announced the availability of its leading cloud solution, Deep Security as a Service, on the Microsoft Azure Marketplace. Launching at Microsoft's Inspire 2019 event, this Trend Micro offering enables organizations to combine the benefits of security software-as-a-service (SaaS) with the convenience of consolidated cloud billing and usage-based, metered pricing.

"Our priority is to make cloud security as effortless as possible, which starts by meeting IT users and developers where they are and then offering comfortable usage and pricing options," said Sanjay Mehta, SVP, Business Development & Strategic Alliances at Trend Micro. "Trend Micro is proud to continue our close relationship with Microsoft Azure as one of its top global security partners. Being part of their consumption-based billing launch for SaaS offerings helps customers looking to secure workloads and containers through their Azure instances."

Trend Micro's Deep Security as a Service will provide Microsoft Azure customers a fully hosted security management experience with rapid delivery of innovations.

"Providing Trend Micro's Deep Security as a Service offering through Azure Marketplace gives customers more ways to enable, automate, and orchestrate cloud security," said Jeana Jorgensen, GM, Cloud and AI for Microsoft. "Customers can pay for only what they use with Trend Micro's flexible, metered pricing or negotiate a more traditional enterprise agreement using private offers while enjoying a consolidated bill for software and cloud infrastructure."

Trend Micro Deep Security delivers a multi-layered automated approach to protect hybrid cloud workloads and container environments against known and unknown threats including malware and vulnerabilities, helping to secure business data and applications all from within one solution. Deep Security consolidates security tools to help lower costs, decrease complexity, and simplify security and compliance.
