

Trend Micro Reports Earnings Results for Q4 and FY2023

- Increase of 11% globally in net sales, at actual currency in 2023
- Realized US\$40+ million in savings to drive 14% operating margin in 2023
- Increase of 19% in subscription annual recurring revenue exceeding US\$784 million in Q4
- Increase of 18% protected enterprise assets, now totaling over 77+ million in Q4

TOKYO, Feb. 15, 2024 /PRNewswire/ -- [Trend Micro Incorporated](#) (TYO: 4704;TSE: 4704), a global cybersecurity leader, today announced earnings results for the fourth quarter and fiscal year 2023, ending December 31, 2023, by reporting 5% and 11% respectively for year-over-year (YoY) net sales growth at actual currency.

As a part of its commitment to driving growth in both the top and bottom line, the company realized \$US40+ million in savings and delivered 14% operating margin* in 2023. A restructuring charge in the fourth quarter, including operational expense efficiencies from supply chain optimization, data center and office space adjustments, and a 2% headcount reduction, sets the stage for increased performance in 2024.

Enterprise customers experiencing simplified security and reduced risk outcomes led to the 19% increase in subscription annual recurring revenue (ARR) for the fourth quarter, now exceeding US \$784 million.

Recent accolades from industry analysts for platform technology advancements contributed to driving an 18% year-over-year increase in protected instances, with Trend's cybersecurity platform now protecting over 77 million enterprise assets across 500,000+ global customers in 175+ countries.

Signals of ongoing demand for its generative-AI driven platform, Trend Vision One™, were seen in attach rate now at 34% of customers and +64% YoY increase in sales to support security operations centers (SOC).

"In the face of predicting and preventing risks across the expanding attack surface of every organization, Trend Micro team members are focused on our customers as a trusted cyber risk advisor and on demonstrating operational efficiency to our investors," said Trend Micro CEO and co-founder Eva Chen.

The company completed a powerful combination of special dividends and an increase in share buybacks as a part of its corporate transformation to optimize its balance sheet and cash levels.

For this quarter, Trend Micro posted consolidated net sales of US\$439 million (147.84 JPY =1USD). The company posted operating income of US\$20 million.

Based on information currently available to the company, consolidated net sales for the year ending December 31, 2024, is expected to be US\$1,843 million (based on an exchange rate of 147 JPY = 1 USD.) Operating income and net income are expected to be US\$359 million and US\$235 million, respectively.
