

Trend Micro Securing Ecosystem Around AI Giant

Enabling organizations to safeguard AI deployments and mitigate evolving cyber threats

Only security vendor

DALLAS, December 10, 2024 – [Trend Micro Incorporated \(TYO: 4704; TSE: 4704\)](#), a global cybersecurity leader, continues to drive advancement in AI-driven cybersecurity through its collaboration with the ecosystem of partners around NVIDIA. As the most globally relevant cybersecurity vendor, only Trend Micro had a presence at each of the three global events held by NVIDIA in 2024. AI Summit in Japan, India and the U.S. featured Trend's AI innovation and leadership in the cybersecurity landscape.

The ongoing partnership will drive innovations that address the evolving challenges of securing AI adoption and deployment to secure critical AI deployments for enterprises and governments.

Kevin Simzer, COO at Trend: "Our work with NVIDIA goes beyond just technology integration; it's a strategic alignment designed to address the complex security challenges that come with AI adoption. With the increasing pace of innovation, the demand for immediate and proactive solutions has never been more critical. By tapping into NVIDIA's capability, we're not only enabling organizations to innovate with confidence but also ensuring that our customers can unlock the full potential of AI without compromising data integrity or operational resilience."

This year, Trend has delivered [significant milestones](#) with NVIDIA, including integrating NVIDIA Networking Infrastructure Manager (NVIDIA NIM) with [Trend's AI-driven platform](#), Trend Vision One™. This collaboration enhances the threat detection and response capabilities, providing customers with unparalleled protection against sophisticated cyber threats and enabling organizations to harness the power of AI while ensuring security measures are in place, ultimately driving business resilience and innovation.

The combined expertise and resources from both companies are well-positioned to lead the industry in developing security solutions that protect against emerging threats and support the secure deployment of AI technologies.
